

## THE QUESTION

"Can you make AI  
do [thing] for me?"

B E F O R E

"It depends."

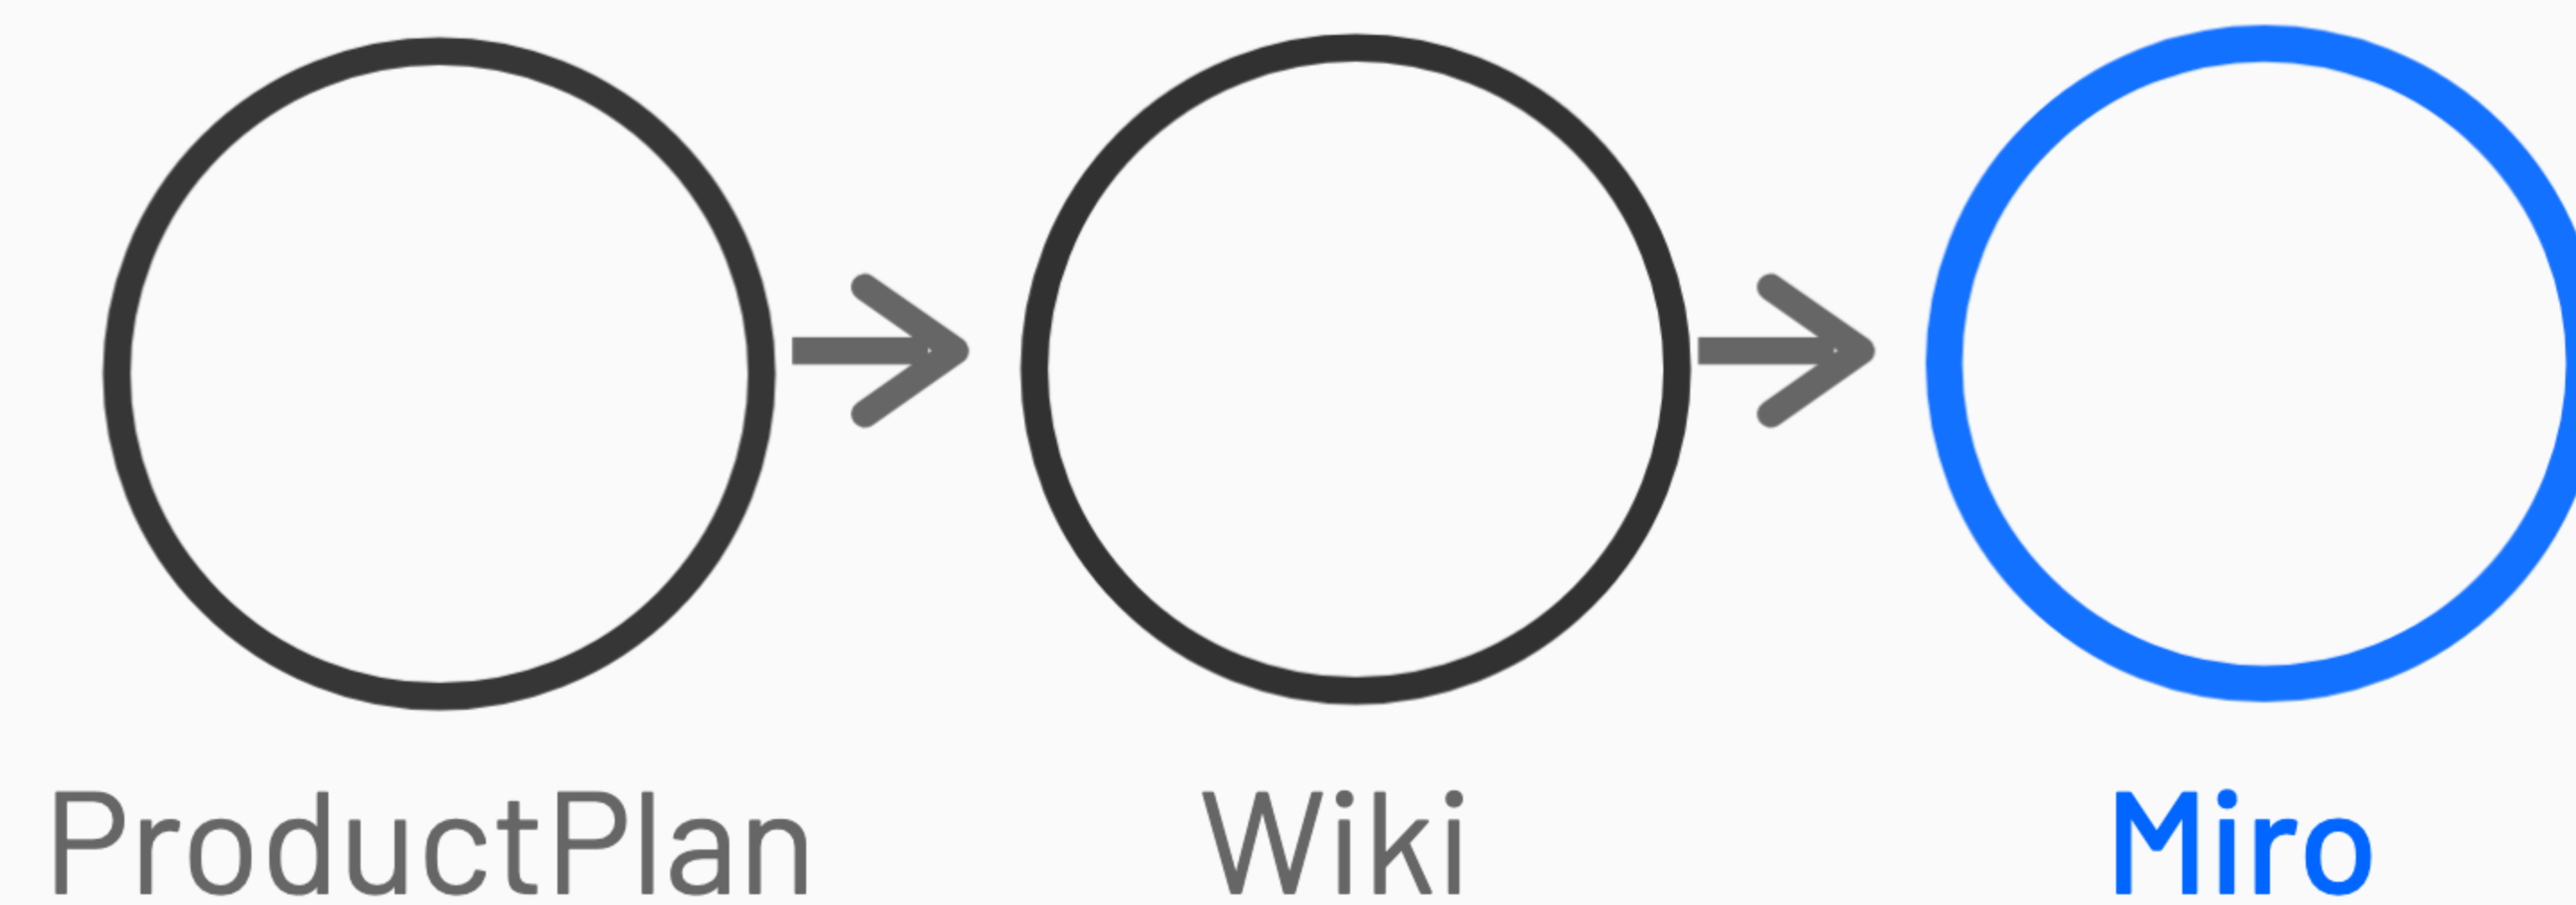

N O W

The answer is usually:

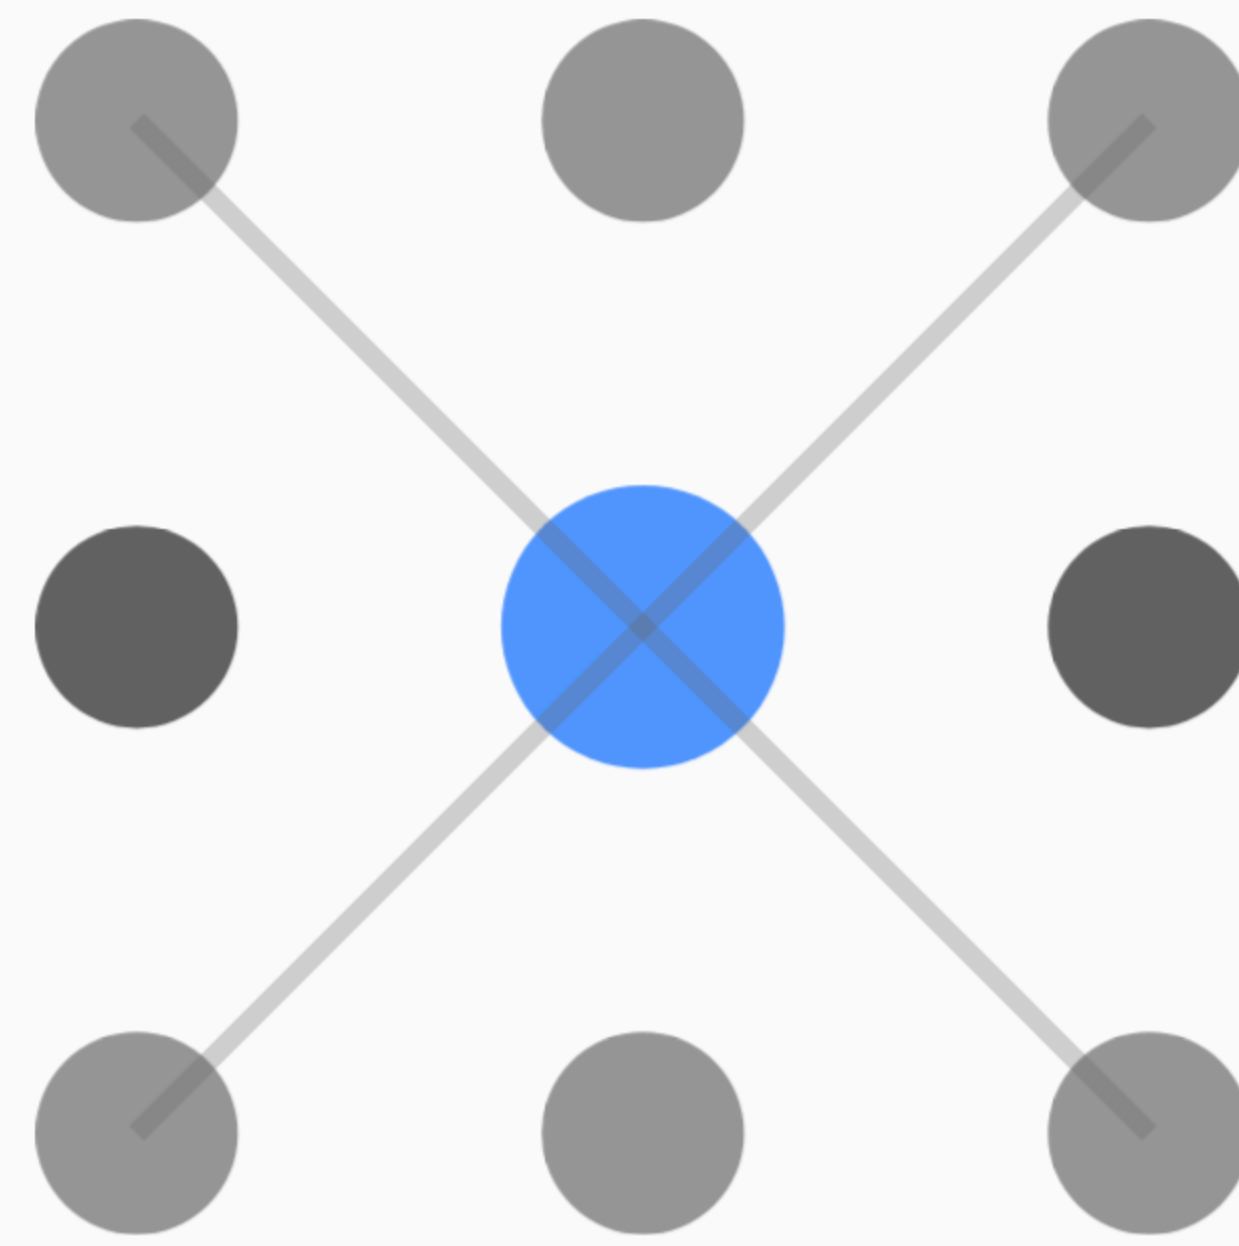

"Yeah, if there's an MCP server  
for that."

BUILT 3 THIS YEAR

Started solving my own  
annoying problems.

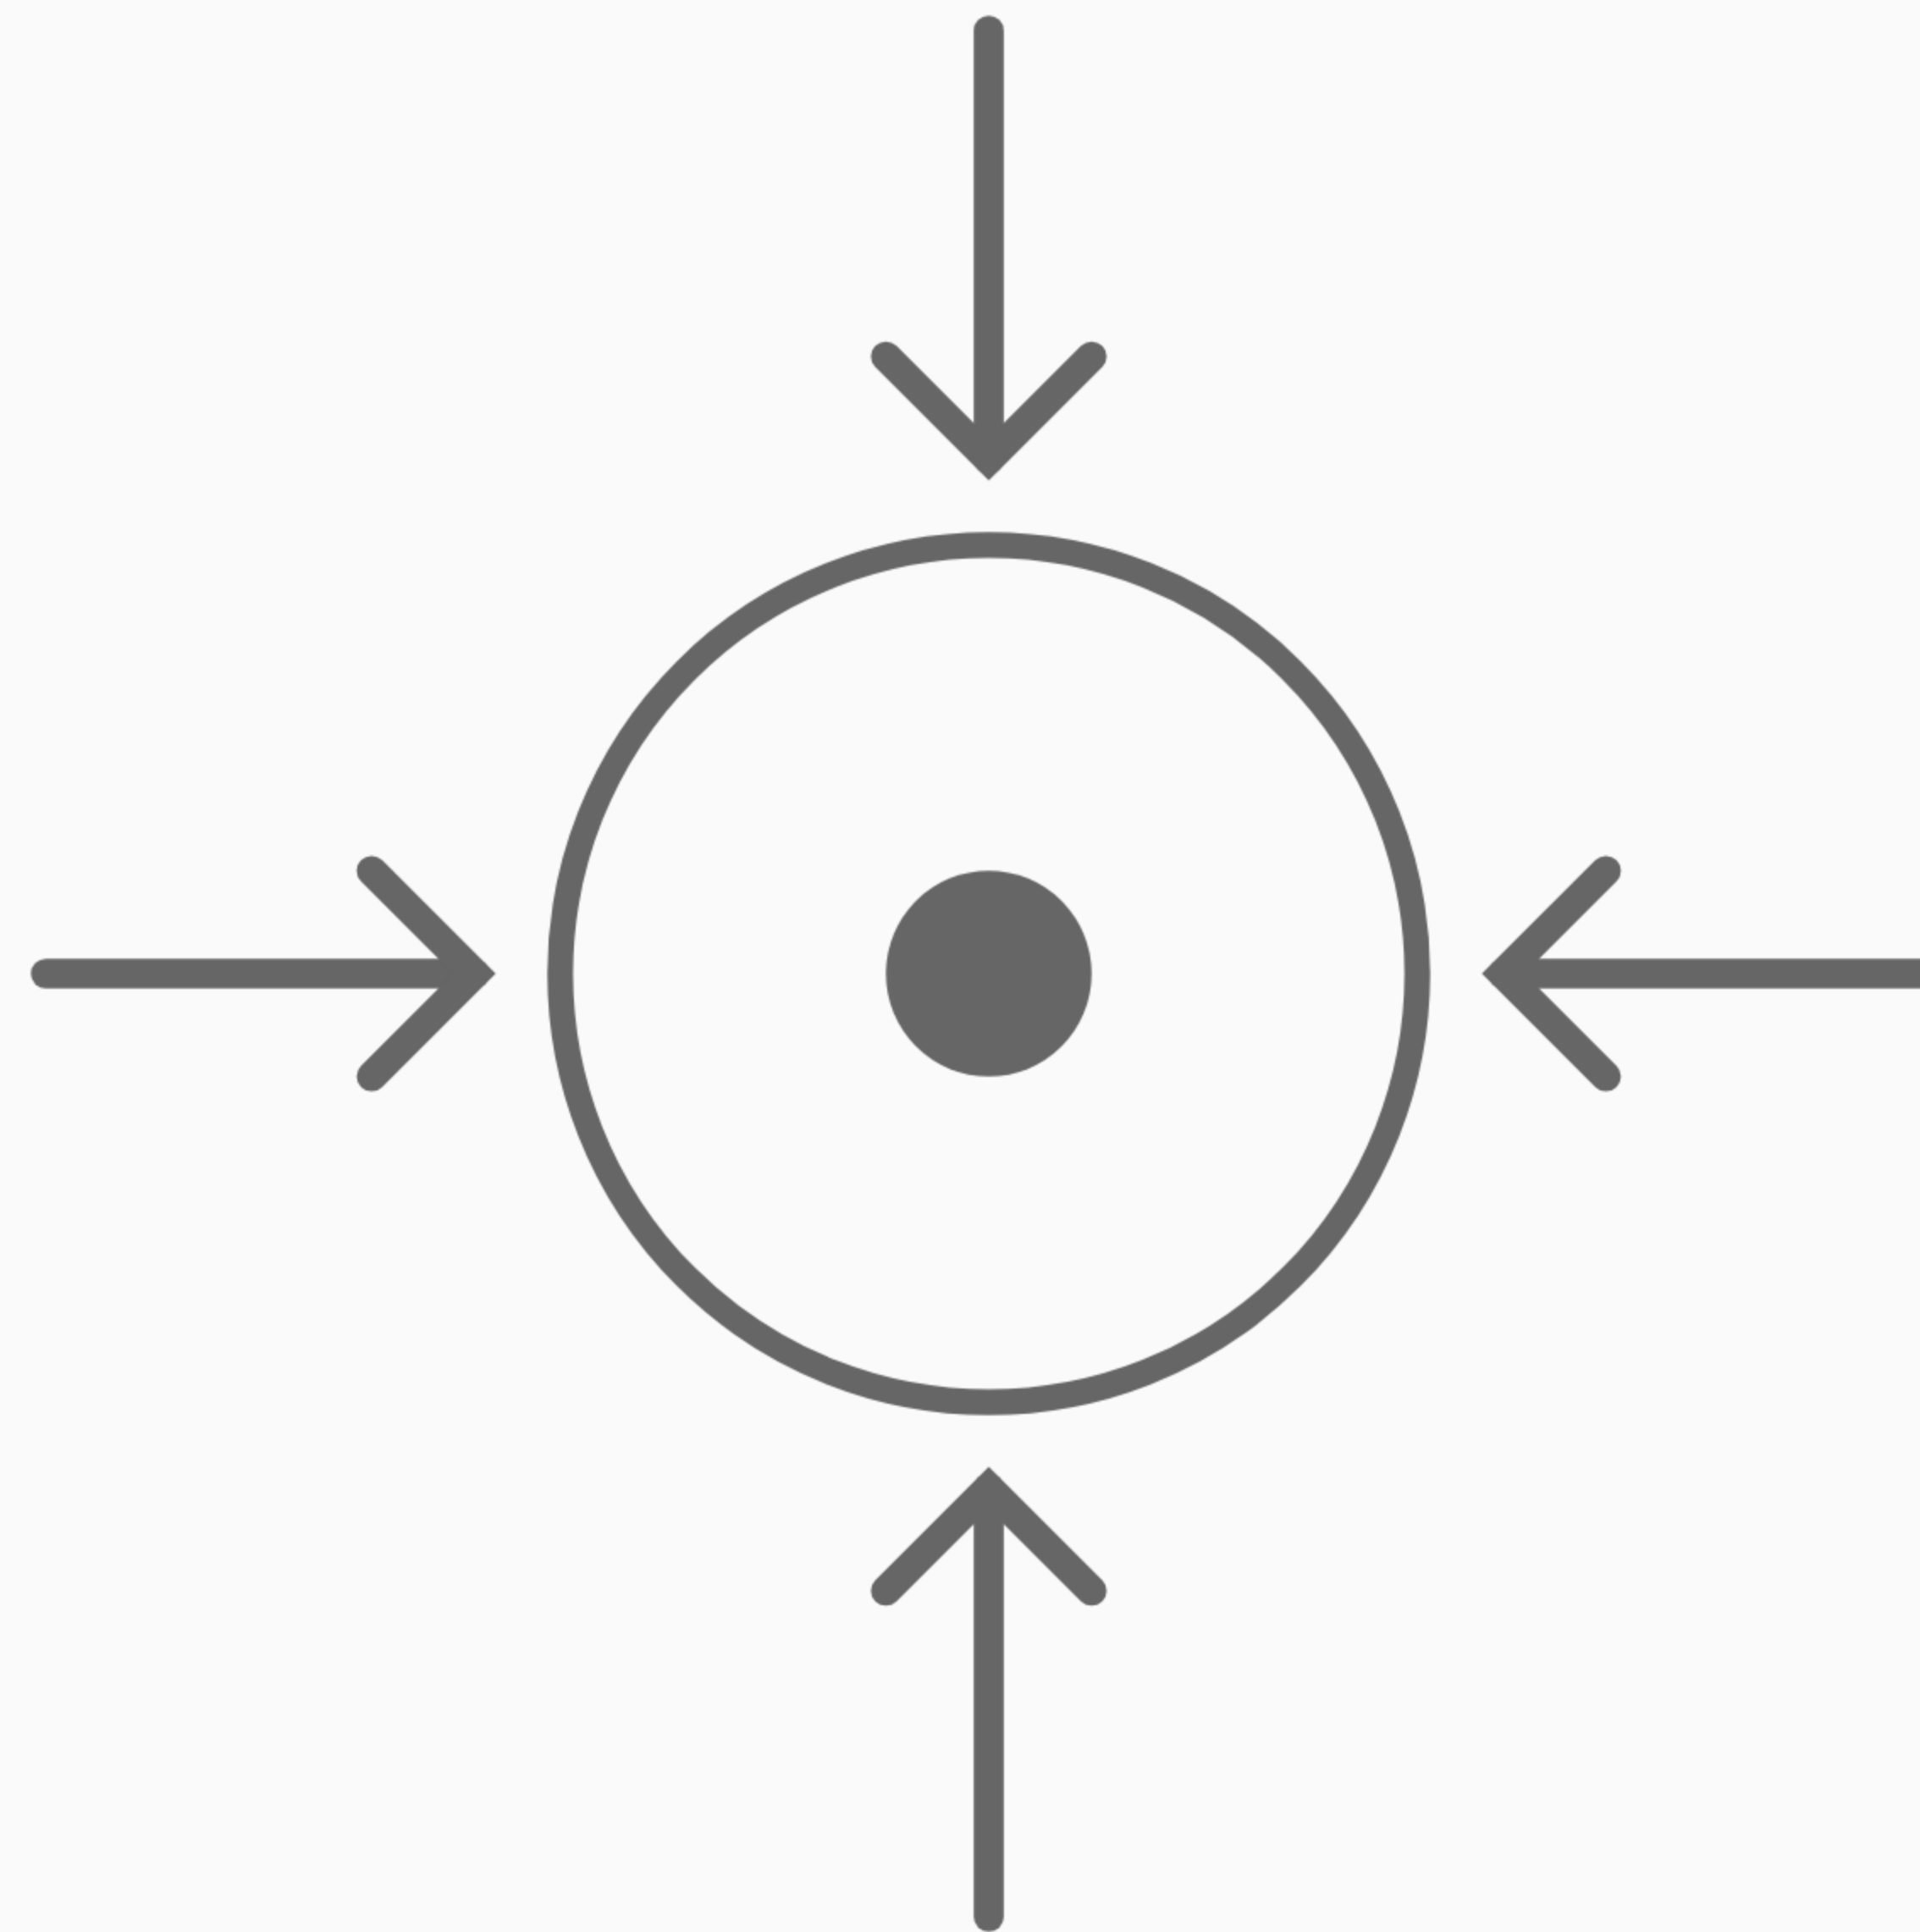

M O M E N T U M

MCP joined the **Linux**  
**Foundation.**

It's not new anymore. It's becoming standard.

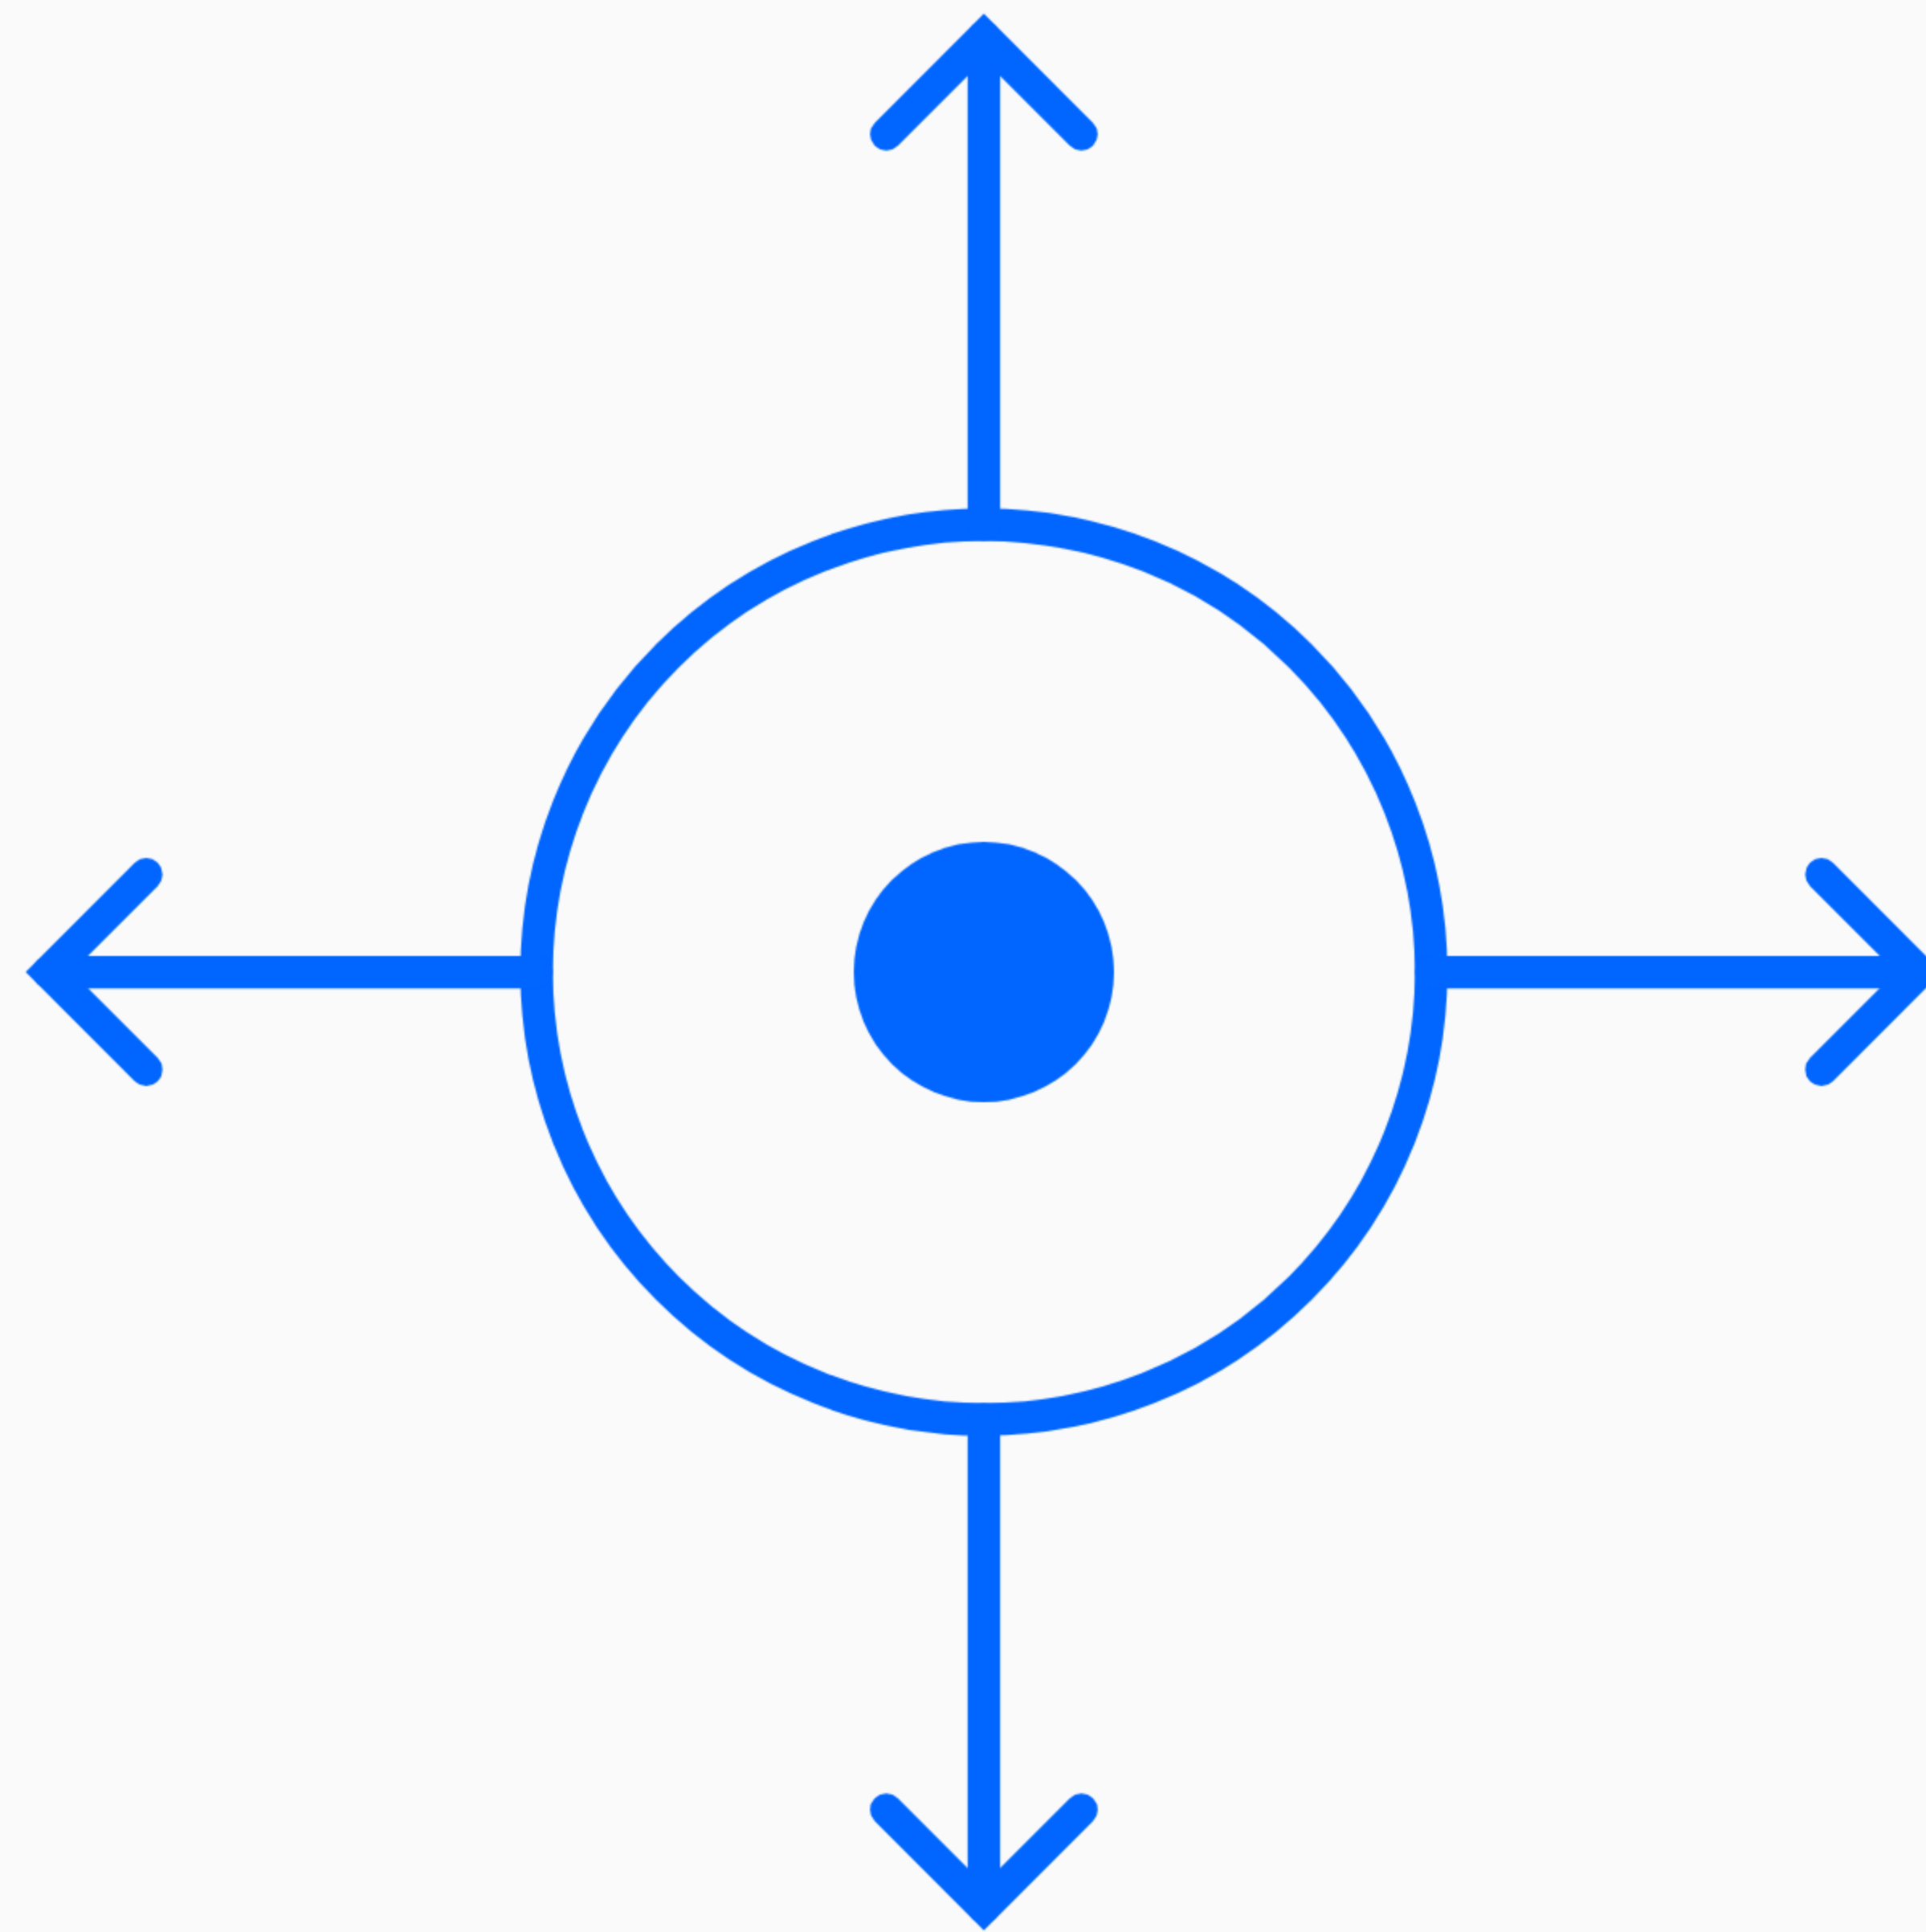

R A G

RAG only **retrieves**.

It can't actually do anything.

M C P

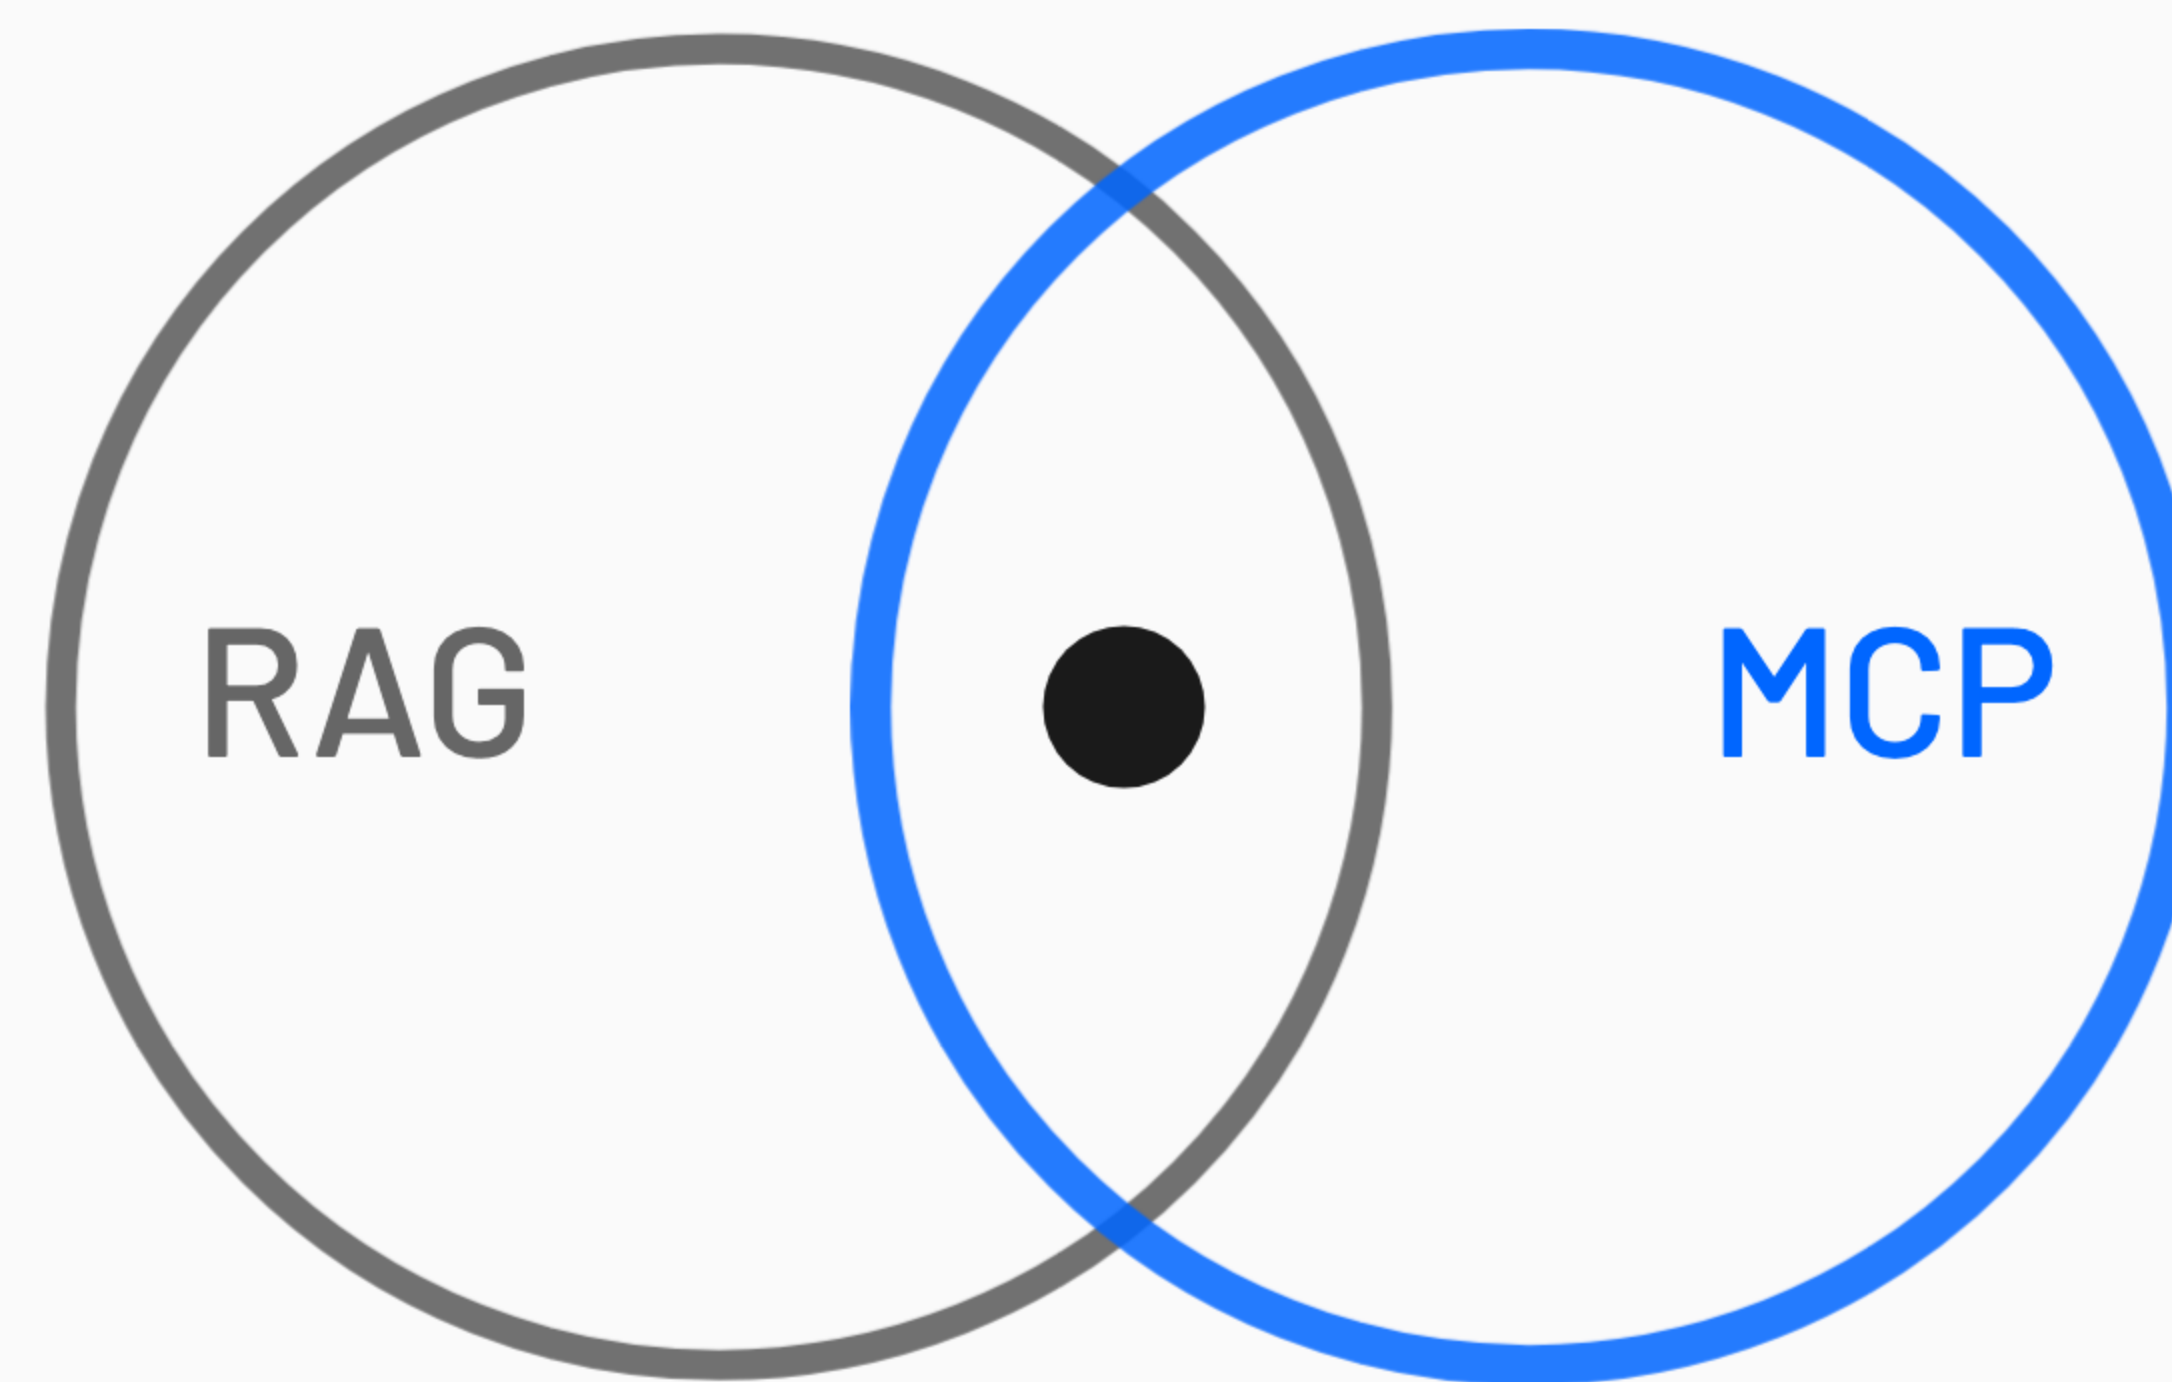

MCP lets AI **take action**.

Click buttons. Create things. Move stuff  
around.

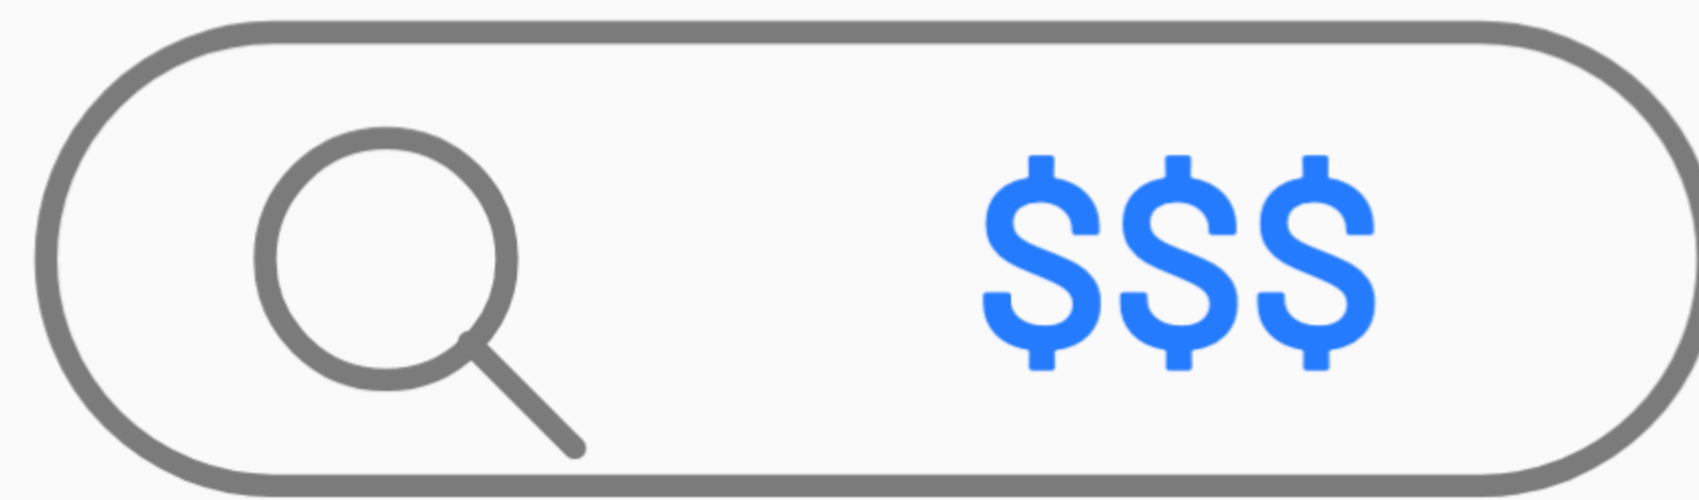

REALITY

You probably need **both**  
eventually.

B U T

An AI that knows everything  
and does nothing?

That's just a very expensive  
search bar.

**Olga Safonova**
